Why a Premier Clean Ducted Vacuum?

- Over 25 years experience manufacturing and designing ducted vacuums in Australia
- Our ducted vacuums come with a warranty of up to 5 years
- Powerful, efficient and quiet
- High performance
- Reliability
- More choice

Installation

Simple and easy to use, a Premier Clean Ducted Vacuum System is the most convenient, efficient and quiet method for cleaning your home.

All of our systems can be easily installed in new or existing homes. Premier Clean offers a large network of qualified professionals to help design and install the ducted vacuum of your choice. You can also install it yourself with the help of our complete DIY installation kits.

Benefits

A Premier Clean Ducted Vacuum System is affordable, safe and user-friendly. Our systems cost little more than a conventional vacuum cleaner and ensure a healthier living environment for you and your family.

Dust and mould are significant causes of allergies, which can also be associated with the use of conventional vacuum cleaners, infrequent emptying of vacuum cleaning bags and poor cleaning. Using a ducted vacuum system eliminates recirculated dust, dirt and odours from your home.

Our ducted vacuum systems allow for easy and thorough dust removal, quickly filtering away dirt to the stationary vacuum unit.

How does a ducted vacuum system work?

Our ducted vacuum units are installed away from main living areas in a garage, basement or external wall of your home.

Vacuum inlets are strategically installed throughout your home and connected to the vacuum unit by a piping system hidden in the walls.

Simply connect the lightweight hose to the floor tool of your choice, insert the hose into the wall or floor inlets and you're ready to clean!

Ducted vacuum unit installed into a garage, basement or similar space

Hose connected to the floor tool of your choice

Place the hose into the inlet and you're ready to clean

- Reliable and powerful deep cleaning technology removes stubborn dirt and dust trapped within carpet fibres that a conventional vacuum cleaner can't reach.

MONARCH SYSTEMS

The Monarch series is a modern and efficient ducted vacuum system with a filter bag unit. With a range of models and features to suit every home, the Monarch series offers soft start technology, variable speed hose options and up to 5 years warranty.

Made from steel and finished in high grade powder coating.

Features

- Soft start module for longer motor life
- Speed variation (optional)
- High efficiency motor from Ametek

Filtration

The Monarch series uses synthetic bags not paper bags. Synthetic bags have four layers compared to two layers for paper bags.

Advantages

- Synthetic bags do not support the growth of mould, fungus and bacteria, which require organic material to breed.
- Synthetic bags have twice the airflow of paper bags and will not burst.
- Filtration performance at submicron particle size at 99+%

- Greater adaptability and cleaning power for superior results and improved indoor air quality, with 100% of vacuumed material removed from your home.

Premier Hybrid Systems

Offering the ultimate in flexible cleaning, the Premier Hybrid series can be used with or without a bag.

Made from high grade ABS material, with a powerful motor, larger air flow and a variety of features to choose from, the Hybrid series has been designed for convenience and versatility of use.

Filtration

When set up with a bag unit, the Hybrid series uses synthetic bags, which have twice the airflow of paper bags.

Advantages

- Filtration performance at submicron particle size at 99+%.
- Using as a bagless, specially designed self-cleaning filter that captures microscopic particles.

- Save time and effort with our bagless filter design.

PREMIER SYSTEMS

The latest in bagless ducted vacuum technology, our Premier Bagless series is quieter and more powerful than a conventional vacuum cleaner and offers a range of benefits and features.

Made from steel and finished in a high grade powder coating.

Features

- Soft start module for longer motor life
- Speed variation (optional)
- High efficiency motor from Ametek

Filtration

The Premier Bagless series uses a weighted filter made from polypropylene resin with three layers.

Advantages

- With filtration to 0.1 micron.
- Easy to clean and replace.

HIDE A HOSE

Introducing the unique retractable hose system.

Finally, no cumbersome hose to lug around or put away!

We have, Hide-a-Hose by Premier Clean.

The concept is simple. A hose is hidden in the pipe, behind its inlet. When you need to clean, simply open the inlet, pull out the length of hose required, attach your tool and start cleaning.

When you are finished, the hose retracts quickly due to the exceptional power of your Premier Clean Vacuum System.

Available in:

- 9m + lengths
- 12m+ lengths
- 15m+ lengths

**ALWAYS READY
FOR USE**

KITCHEN, BATHROOM + LAUNDRY SOLUTIONS

Clean efficiently with 1 hand, in 1 second! The WallyFlex is an essential tool for the kitchen, the bathroom, the laundry, and even the walk in robe. It is practical, nice-looking, and easy to install onto any standard vacuum inlet.

Classy, and ridiculously affordable.

VACUSWEEP AND VACPAN

Vacusweeps give your broom the power of a ducted vacuum for the ultimate in versatile cleaning. Ideal for use in kitchens, bathrooms or any other room that does not have carpet.

An inlet is easily installed into the your new or existing home's kitchen, bathroom or laundry. It is flush mounted to your kickboard, making it convenient and discreet. No on/off switch, simply lift the foot switch to turn it on, sweep the dirt towards the vacuum powered inlet and the dust is whisked back to the central system.

Available in white, almond and black. Stainless Steel faceplates available for Vacpans. Vacusweeps available in silver.

DECO INLET VALVE

High quality Deco Inlet for Ducted Vacuum Systems

Easily adjustable, the Deco Inlet is available in a wide array of finishes and colours to match your home decor.

A designer look, of undeniable quality.

Deco Valves

Deco Metal Plated Valves

DELAGO SWITCH AND VARIABLE HOSES

Switch On/Off Hose

Superior low-voltage hose and you can control the vacuum system from the handle.

2 Speed Variation Hose

Superior low-voltage hose and you can control the vacuum with a low speed (ideal for delicate items) or high speed for normal operation.

Flexible and crush resistant hose, that can turn the system on or off from the handle. The handle swivels a full 360 degrees which eliminates kinks.

DELAGO HOSE SETS

It's not just the ducted vacuum that counts, the hose kit that you use with your vacuum is just as important. Delago Hose Sets are designed to compliment your Premier Clean Ducted Vacuum System and are available in a range of options.

Standard Set

Switch Hose Set

Deluxe Switch Hose Set

Garage Hose Set

Hose sets available in 9m and 12m lengths. Compact Hose set is without upholstery brush.

DELAGO ACCESSORIES

Premier Clean provide complete cleaning solutions for your home. We offer a wide range of ducted vacuum tools and accessories for carpet, hard floor and tiled surfaces.

**HARD FLOOR
BRUSH**

The Delago Hard Floor Brush

This has soft bristles which prevents damage to floors and cleans thoroughly. A must have for any home that has large areas of wooden or tiled floors. Available in 10 or 14 inch sizes.

Hard Floor Brush: Bottom view

**TURBO
BRUSH**

The Delago Air Driven Powerhead

Ideal for cleaning of carpets and rugs. It's square edges allow access to the most difficult areas to clean. The roller brush speeds up with airflow and dislodges dirt or dust. A must have for carpet floors.
